

ALSO AVAILABLE WITH ELECTRONIC POWER STEERING

### BEST ERGONOMICS

- Large floor boards and most knee room.
- Aggressive heel and calf pockets for ease of movement.
- Seat design is narrow in front & wide and thick in rear.
- Thick & soft hand grips.
- Full mud protection with inner splash shields.

### SUSPENSION

- Rolled Independent Rear suspension minimises rear-end squat and provides better bump absorption.
- Rolled IRS is coupled w/progressive, dual-rate springs with adjustable preload front & rear.
- Dual A-Arm front suspension with longer control arms.
- Models feature the highest suspension travel with 22.9 cm front and 26 cm rear.
- High ground clearance at 30.5 cm.

### TRANSMISSION

- Roller-driven clutch reduce friction and provides smoother, faster clutch response and back shifting.
- "Low" gear with speeds up to 62 kmph in low range.

### ANTI-KICKBACK STEERING

- Longer A-Arms & largest wheels moves the steering pivot of each axle to the most neutral center part of the tyre.
- Power steering models offer the most powerful steering system available on an ATV.

### POWER

- High pulling and towing power with 680.4 kg capacity.
- 40 HP

### BIGGEST RACK CAPACITY

- XP 550 has the biggest rack capacity at 55 kg front & 110 kg rear.
- Racks feature 100 built-in, tie-down points.

### ON DEMAND TRUE ALL-WHEEL DRIVE

- The easiest, fastest responding Polaris On Demand All-Wheel Drive (AWD) system automatically engages when the rider needs more forward traction. It reverts to 2WD automatically when AWD is no longer needed.

**NEW! REDESIGNED 14" CAST ALUMINUM SPOKE WHEELS AND 26" CARLISLE TERRATRON TYRES**  
*(on EPS models)*  
**STEEL WHEELS** *(on non-EPS and Camo models)*

### ENGINE

- Powerful 550cc single EFI with 42hp.
- Decreased engine vibration due to rubber mounting to chassis & internal balance shafts.
- Large airbox for more power and quieter operation.
- Largest starting motor for more reliable starting.

### BRAKING

- Features largest brake discs for superb stopping power.

### ENGINE BRAKING SYSTEM (EBS) w/ ACTIVE DESCENT CONTROL (ADC)

- ADC provides four-wheel braking when vehicle is in AWD, ADC is operating at speeds below 24 kmph and no throttle is being applied.
